#### **STEP 1. – CREATE RACE**

Create race in the club manager(Topigeon\_One\_Loft\_UTC program for OLR V8).

Go to Races(1)-> AddNew(2) -> Check Customized Lib Point button(3) and input data to all fields and click Save(4)

\*(for Longitude and Latitude input format is Exxx.xx, where x – digits, for example E123.40.50 – is East 123° 40' 50", S002.01.09 – is South 2° 1' 9", for Longitude use E or W, For Latitude N or S)

### **STEP 2. – MARK BIRDS FOR THE RACE**

Connect Chip Scanner to PC, make sure it uses COM1 port. Then go to Clock Operation(1) - >Marking(2)->Choose Race Code(3) and read all the Erings to mark those birds for the race. All birds should be matched with Ering before the marking, only matched birds will appear in the list available for the race. When the bird is successfully marked you will see the race code and date(4) for that bird in the table.
